

Lab 8

Dmitriy K. Fedotov¹

RUDN University, 02 April, 2021 Moscow, Russian Federation

¹RUDN University, Moscow, Russian Federation

- I am Fedotov Dmitriy.
- Third year student of the Rudn University

Why do Lab 8?

- This model describes the turnover of two companies and allows you to assess the financial success of the chosen business strategy.
- This research analyzes the impact of business decisions on a company's turnover.

- Consider model of competition between two firms

- Build graphs of changes in the working capital of the company 1 and firm 2, excluding fixed costs and normalization for different cases.

In the course of doing the work, I learned:

- Build graphs of changes in the working capital of the company 1 and firm 2, excluding fixed costs and normalization for different cases.

Thank you for the attention.
